EDUCATION

George Washington University, Washington DC

PhD in Computer Science

Clark University, Worcester, MA

Bachelor of Arts in Computer Science and Philosophy | **GPA:** 3.83/4.0

COURSEWORK

Design and Analysis of Algorithms, Data Structures & Algorithms, Database Management and Systems Design, Computer Networks & Network Security, Internet of Things (IoT), Tech Ethics & Public Policy, Race & Data, Analysis of Programming Languages, Robotics and Intelligent Systems, Automata Theory

SKILLS

Languages: Java, JavaScript, C#, C, Python, Rust, HTML5, CSS3, SQL, R

Technologies: Node.js, jQuery, Express, Postgres, Django, MongoDB, AngularJS, React, React Native, Typescript, Network Programming (TCP/IP, sockets, etc.), NGINX, ElasticSearch, Selenium, Puppeteer, Vite, Actix

Software: Visual Studio, Git/GitHub, Excel, Figma, Docker, Microsoft Azure

Qualitative: Research Methodologies, Statistical Analysis, UI/UX Design, Accessibility Testing & Assurance, WCAG 2.0

PROJECTS

GWUSEC Survey Software

- Custom survey software to build and maintain surveys. Users can design custom components for more sophisticated interactions compared to other survey tech, such as Qualtrics.
- Built in ReactJS, utilizes Docker to host and maintain.

Authentication Accessibility Library

- A work-in-progress personal project that implements unique authentication mechanisms that are disability-focused, including an ASL passphrase selector, graphical and musical passwords.
- Designed to be directly implementable by web developers and designers.
- Built with RUST, Actix, MongoDB, and ReactJS.

WORK EXPERIENCE

Disability Rights and Tech. Policy Intern

The American Association of People with Disabilities + The Center of Democracy and Technology

6/26-8/26

- Researching and collaborating with stakeholders on the security and privacy harms of technology focused on older adults.
- Collecting papers, writing reports, and conducting analysis on technology, law, and policy that result in tech harms that impact the disabled community.

Digital Accessibility Developer — *The American Heart Association*

1/23-8/23

- Assisting designers and developers on best practices for providing accessible solutions.
- Ensuring web engineers uphold accessible experiences before and beyond product launch.
- Identify components and patterns for accessibility refinement and prioritization.

Research Assistant — *Clark University*

6/21-5/23

- Worked with departments to create PDF optimization software that makes PDFs more accessible.
- Created a data collection tool using Python, Django, and Docker that targeted and analyzed data from password managers and websites to ensure usability.
- Optimized microcontrollers to automate plant watering/temperature moderation.
